ENJOY !!

Once upon a time in a peaceful village, Arbi the knight and his friends were celebrating 'Happy Animals' Day'. All the villagers were enjoying a delicious feast as they laughed and joked together. They were all content, knowing they were safely protected by Drako the dragon. They didn't know their day was about to change drastically...

Oh dear! I've run out of berries for my special pie for the feast!" gasped Smarlow the tortoise.

"Don't worry. We'll help you," offered Arbi.

"I'll help you sniff out the berries in the forest," said Smellit the dog.

"I can help you collect the berries very quickly!" said Agick the cat.

Some of the villagers offered to help pick berries too. But these friends were going to find something far more exciting than berries in the forest...

The four friends walked through the forest with the villagers, following Smellit to the berry bushes.

"Hey! I found some berries over here!" called a villager in the distance.

Smellit suddenly started sniffing loudly under a large berry bush.

"Have you found something?" asked Smarlow.

"I can smell something strange under this bush," said Smellit.

"Let's find out what it is!" said Agick excitedly.

# ABOUT THE AUTHOR

Iker Burguera (Legazpi, 1986) is a Senior Software Engineer and entrepreneur, holding an advanced degree in Telecommunications Engineering from Mondragon University and having completed his Master's thesis at Linköping University (Sweden).

His professional background focuses on the development of artificial intelligence, augmented reality, and virtual reality, with a clear orientation toward building innovative technological products. Committed to open-source principles, he combines technical rigor with strategic vision, driving projects grounded in emerging technologies and advanced architectures.
